

## Fibrevore Recovery Paste Beneficial Fibre for convalescing pets

Fibrevores are fragile & complicated in their physiological needs. Diet is vital to their health & wellbeing; this is magnified when they are under physical stress.

After illness, surgery or in cases of poor health, fibrevores can be unable or unwilling to eat. Without fibre their digestive system slows and their health can quickly deteriorate. It is vital that there is always food in their system, even whilst anaesthetised as their major organs can show signs of anorexia and damage in a matter of a few hours.

Excel Fibrevore Recovery Paste is a ready to use food that can be administered easily and quickly. It helps maintain the digestive system and supplies high quality nutrients to the pet.

## Fibrevore Recovery Paste

### Beneficial Fibre for convalescing pets

#### Uses:

In all cases below fibrevores may be unable or unwilling to eat.

- During / post illness
- Post Operative / neutering
- During periods of stress like re-homing / newly purchased

#### How to administer:

The paste must be administered directly into the Fibrevore's mouth while it is awake and preferably alert.

#### Excellent critical care:

- High in natural Beneficial Fibre to get the digestive system moving again
- Suitable for Guinea Pigs & Chinchillas as well as rabbits as it contains sufficient Vitamin C
- Contains scFOS Prebiotic to help feed the friendly bacteria and to maintain & support gut flora levels
- Simple and complex carbohydrates supply immediate low level energy to invigorate the recovering pet
- Natural antioxidant protection to help support the immune system
- Delicious aniseed flavour to encourage the pet to eat and stimulate appetite
- Added vitamins and minerals to help aid recovery and health during or after stressful situations.
- Premixed and ready to use

#### Feeding Guide:

- Excel Fibrevore Recovery Paste is a complementary food for rabbits, guinea pigs, chinchillas and degus
- Feed 5ml, 3 times a day for one to two days or as directed by a veterinary surgeon or veterinary nurse
